Opus

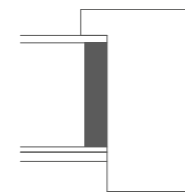

Information

These mouldings have a stained wood veneer. At point of order there may be variances in both colour and grain. With age, all finishes will oxidise and change in colour.

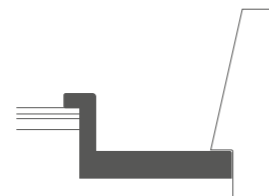

Ian Boichat - Origin Studios

Information

The deep rebated Opus profiles can incorporate a matching wooden slip. This creates a significant distance between the contents and the glass.

Information

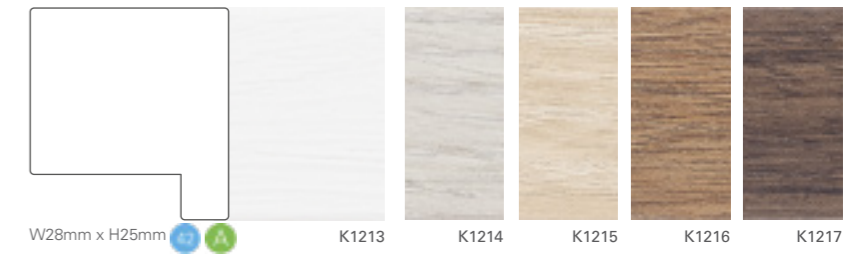

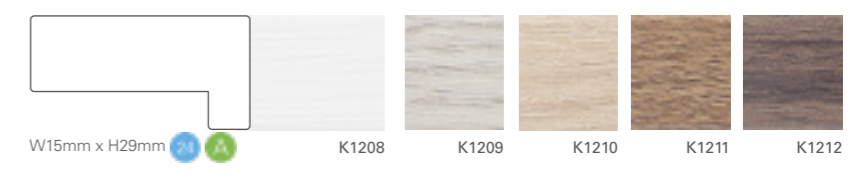

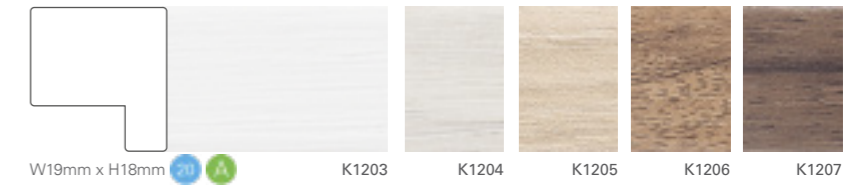

The Opus bevel profile looks great as it is. For a statement piece there is a wooden shaped insert in white or off-white. This insert can hold either a laminated image or a mounted image behind glass.

Mount combinations

Accent layers & V grooves

Any combination can have an accent layer or V grooves. An accent layer is a contrasting colour mount layer that is positioned immediately under the topmost layer. V grooves are scored into the mount board surface for added interest.

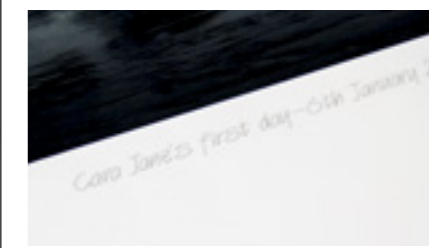

Personalisation

Replicate your signature using a pen plotter. Signature applications are available in pencil, black and silver pen, or have your signature debossed!

Replicate a signature with a self-inking stamp. Stamps can be purchased from a third party provider and will require testing before forwarding to us.

Text to complement an image(s) can be added using a pen plotter. There are a number of set fonts to choose from.

A small selection of the hundreds of options available.....

Can't find what you're looking for?
Make a **Bespoke** layout!

We have developed software that enables design of your own mount layouts online. Store them for repeated use or simply modify them as required.

Nicholas Frost Photography

Wild Earth Fine Art

Printing

Printing is available to complement our full assembly framing service and is an integral part of the manufacturing process for the other products that we offer. We do not colour correct or edit images, we simply print the file as we receive it.

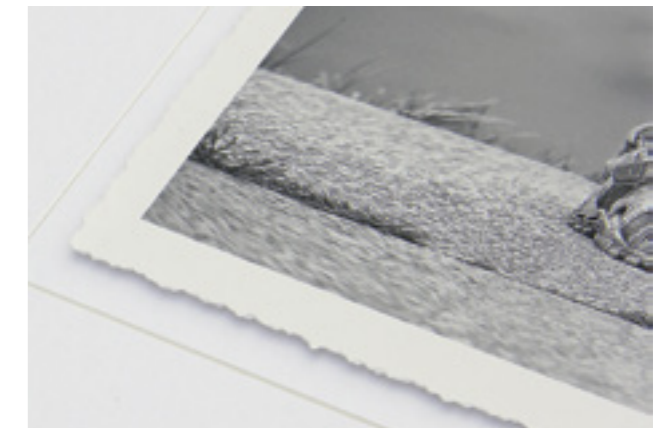

- Large format colour inkjet printer - Epson CP1000
- Canvas • Fine Art
- Ultra White • Pearlescent
- Large upload capacity via the website
- Adobe 98 & SRGB colour space accepted
- Jpeg & Tiff files accepted
- Test printing packs available

Giclée Printing

The word Giclée is derived from the French verb gicler meaning "to squirt or spray". Giclée is used to describe a fine art digital printing process combining pigment based inks with high quality paper. Giclée prints are printed on a variety of substrates or mediums, the most common being cotton rag. This fibrous paper transforms a photograph into a painterly, soft image that adds a classy, decorative feel making it perfect for everything from portfolios to art prints for exhibitions.

Surprisingly, amongst our peer group we were the first to routinely offer fine art printing. We now regularly deliver high quality print runs for artists, illustrators and photographers alike.

Available with décollage edge

Mounted prints

You don't always need a frame. A mounted print can look exceptional if it is presented well. Mounts cut to any size, images printed to any size and supplied with a choice of backing for a neat finish. Computerised signatures can be applied along with an option to deboss.

Part of a society/association? We can help with your qualification panels, speak to us about costs and ideas as we offer reduced rates on sets of mounts.

Mackney Photography

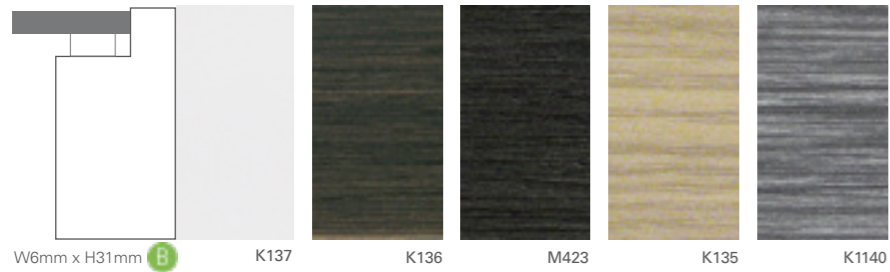

Box Installation

Images are laminated and framed in a range of mouldings standing 31mm deep.

The layouts available have been designed to sit together within a single presentation box. Instantly the recipient gets the wow factor when the box is opened. The consumer then has the option of hanging them in the format of our design or however they choose.

See layout options opposite

- 31mm frame depth
- Satin lamination
- Pearlescent prints available

Box Frame

Prints are laminated onto 3mm PVC foam board at any size up to 48X36. The laminated print is then placed into a linear moulding. There is a range of composite mouldings that are ideal as a cost-effective yet attractive solution.

- 54mm or 31mm frame depth
- Satin lamination
- Pearlescent prints available
- Sizes up to 48 x 36 inches

Paul Wilkinson Photography

W6mm x H54mm K134 M046 M043 M041 K043

Canvas Wraps

A canvas wrap offers a display option with warmth. Utilising a poly cotton blend material softens the image whilst bringing it to life. Available as a full image wrap or with coloured edges, the depth of the canvas is also optional.

Available at any size up to 48X36 inches, they all have several coats of matt lacquer applied prior to stretching. The canvas is stretched, by hand, over a solid wood frame faced with board to prevent the canvas deforming during handling. Flush fixings allow the canvas to hug the wall.

30mm (shallow) or 55mm (deep)

Blocks

Vicki Knights Photography

The blocks are made of MDF and can be ordered at any size from 8X8 up to 48X36. Prints are laminated directly onto the blocks which can then be finished in a choice of appearances to suit budget and taste.

Block Colours

Black White Black / Silver White / Silver Oak Wenge Walnut

Desktop Blocks

Made as our other Block products but with the addition of a stand, easy to use and looks great!

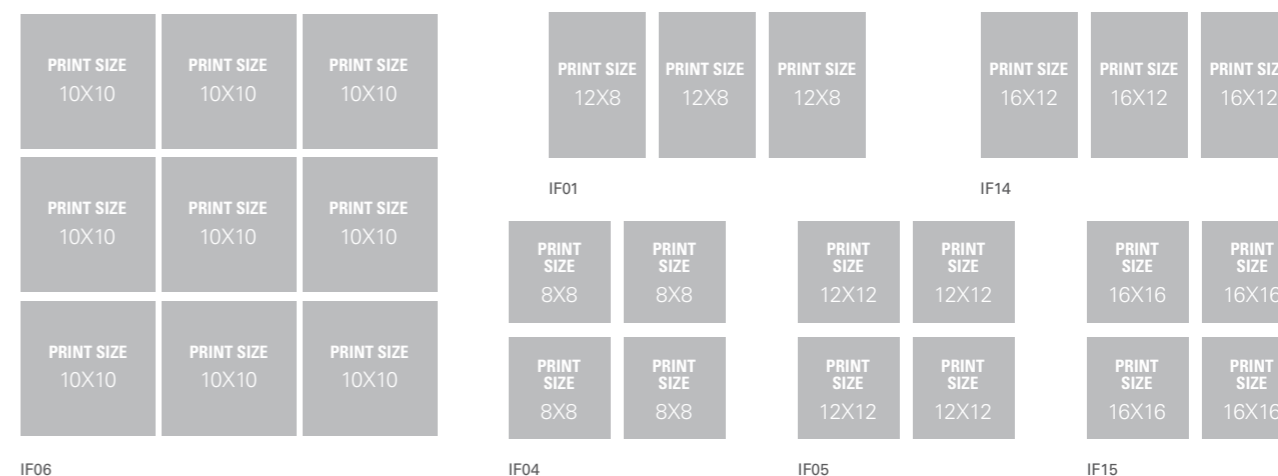

Images courtesy of Shutter & Co, Paredes Photography & Paul Wilkinson Photography

- 18mm deep
- Satin lamination
- 7 edges available
- Pearlescent prints available

Block Installation

See layout options below. All sizes shown in inches

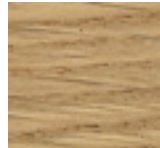

Edge

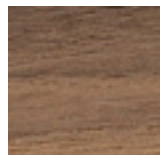

Minimalist products are in vogue. For some, whilst the sharp look is important, it can appear a little stark. This is when an Edge solution is useful. Edge is available in a number of finishes, painted woods, foils and real wood veneer wraps. Available with either Canvas Wrap or Block inner sat down within the frame, drawing the viewers eye to the image within.
